

## Money

This week we will continue with money. It would be a great idea to set up shop somewhere in your house for the week. Label items any price from 1c to 5c. Make sure your child understands that a 2c coin is the same as a 1c and a 1c. Make sure also that your child understands that a 5c is the same as a 1c, 1c, 1c, 1c and 1c. And so on. Have fun, play shop with your child if you can.

Go to cjfallon interactive pages the same as last week and complete the weblinks 117 and 118.

You need to press on the blue eye below on the right hand side. Your child should be able to play these games now.

REMEMBER: The 2c coins are the same as a 1c and a 1c so count on the 2c twice on p. 118 opposite the pineapple question. Children can find this difficult. Don't worry. It will come with practice.

When it comes to completing pages 118, I always get the children to draw two lines on 2c so they do not get confused when counting the coins altogether.

Just like we did last week. Your child should now be ready to complete their **Busy at Maths pages p. 117 and 118.**
